

13. Tools

13.1 Database Backup

- A backup of your current configuration and catalog.
- The backup feature saves all current store information into a file in the server.
- Backup copies are dated

Backup: archive of the current states/catalog/items/etc. into a file (compressed or not compressed)

Restore: restores the store states/catalog/items/etc from an archive

Database Backup Manager

Title	Date	Size
Backup Directory: /home/webusers/hostforgood/hostforgood.com/www/shop/backups/		
Last Restoration: db_epr_10014-20030711152306.sql (forget)		

- To backup, simply click on the “backup” icon.
- Select the compression format and click on “backup” (**gzip or zip**: compression format; **no compression**: no compression)

Database Backup Manager

Title	Date	Size	Action	New Backup
Backup Directory: /home/webusers/hostforgood/hostforgood.com/www/shop/backups/			restore	Do not interrupt t which might take minutes. ☒ Use GZIP ☐ Use ZIP ☐ No Compress ☐ Download on server side)* *Best through a l backup
Last Restoration: db_epr_10014-20030711152306.sql (forget)
